The Perseus Books Group, United States, 1998. Paperback. Book Condition: New. 198 x 122 mm. Language: English . Brand New Book ***** Print on Demand *****.Laboratory Earth taps the relevant knowledge from physical, biological, and social sciences needed to study the planet holistically. This so-called Earth Systems Science fosters a new way to understand the Earth and our roles as inhabitants, with the purpose of building solutions to the bewildering global environment and overdevelopment.Educational, business, health, and governmental organizations often dissect the world into narrow but highly specialized disciplines--economics, ecology, cardiology, meteorology, glaciology, or political science, to name a few. But real world problems, like urban sprawl, public health, poverty, toxic waste, economic development, the ozone hole, or global warming, do not fit neatly into disciplinary boxes. However, author Stephen Schneider asserts that these contemporary issues must be viewed as systems of interconnected subelements. This is especially true for global environmental problems, since they arise from increasing numbers of people demanding higher standards of living and willing to use the cheapest available technologies to pursue these growth-oriented goals, even if the unintended byproducts include land degradation, toxic pollutants, species extinctions, or global climate change. To first understand and then solve such problems, we must learn to view the Earth and our socioeconomic engine as one integrated system.Schneider, who in the 1970s predicted global warming would become demonstrable by the turn of the century, chooses that debate to illustrate how this twenty-first century Earth Systems Science approach works, introducing us to the sharp controversies and highly visible debates among climatologists, ecologists, economists, industrialists, and political interests over the seriousness and solutions to the climate change crisis. He begins with a fascinating journey to the beginning of geologic time on Earth and traces from there the coevolution of climate and life over...
